

# POUR-N-RESTORE® OIL STAIN REMOVER

TOLL-FREE: 1.877.609.3343

EDGEWATER INDUSTRIES 18570 TRIMBLE COURT SPRING LAKE, MI 49456 U.S.A. PH: 616.846.7939 FX: 616.846.1473 WWW.EDGEWATERINDUSTRIES.COM

PATENTED

## APPLICATIONS

- Pour-N-Restore® will remove stains caused by motor oil, grease, anti-freeze, transmission fluid, hydraulic fluid, cooking oil, food grease, citronella oil, wax, and other oily materials.
- Perfect for garage floors, driveways, patios, and other areas where concrete, stone, brick, and similar masonry materials are found to have oil stains.

*"Simply amazing stuff. One of the first products I ever used that does what it claims."*

Pour-N-Restore® combines a powerful citrus degreaser with a non-leaching absorbent powder to create Micro-Extraction Technology™. This technology allows Pour-N-Restore to soak deep into concrete and masonry surfaces, locking onto embedded oil-based stains at a molecular level. As Pour-N-Restore® dries to a powder, the stain is extracted to the surface and absorbed for easy cleanup. No scrubbing. No rinsing. No mess.

## FEATURES & BENEFITS

- Easily lifts deeply embedded stains with patented technology.
- No scrubbing or rinsing required. Just apply, let it dry, and sweep it up.
- Effectively captures stains for proper disposal as it dries from liquid to powder.
- Utilizes the cleaning power of citrus to create a biodegradable and phosphate-free formulation.
- Accurate dispensing and no mess when using Pour-N-Restore® squeeze bottles with the flip-top cap.
- Coverage per gallon is approximately 24 sq.ft.

Pour-N-Restore Oil Stain Remover	Conventional Degreasers
No scrubbing required.	Scrubbing is required.
No mess. Pour-N-Restore does all the work. As it dries from a liquid to a powder, oil stains are lifted and absorbed.	You work up a sweat from vigorous scrubbing, making an even bigger mess in the process.
No rinsing is required. When Pour-N-Restore is dry, simply sweep it up.	Requires you to drag out a hose and rinse the area with water after use.
Environmentally responsible. Because Pour-N-Restore absorbs the stain as it dries to a powder, proper disposal is easy. Just sweep it up.	Environmentally disruptive. While rinsing, oil gets flushed down storm drains or off to the side of concrete where it soaks into the ground.
Penetrates deeper to remove embedded stains.	Only remove surface oil, so embedded stains often wick back up and reappear.
Helps to ensure proper adhesion of coatings when used as a prep, because it penetrates deeper into embedded stains.	Because only the surface is cleaned, oily residue can wick back up and cause coatings to release.
Often requires just one application for satisfactory results.	Several applications may be needed to produce satisfactory results.
Citrus-based, biodegradable, and phosphate-free.	May contain harsh solvents or acids that are more harmful to people and/or the environment.
